

mSAMEDX

[08 / 2022]

Cryptocurrency Exchange
V 0.5

Intro

Founded in 2021, mSamex aspires to be the cryptocurrency exchange of the traders, by the .traders, for the traders

.mSamex is registered as MESH YAZILIM VE TEKNOLOJİ Limited in Istanbul / Turkey

Our platform offers tools and features that would meet the expectations of even the most demanding and sophisticated traders, enabling them to engage in real-time trading with .low latency, high reliability, and peak performance

The purpose of this paper is to shed light upon the launching of mSamex Token (SAMX), thereby elaborating upon its core mechanics, tokenomics, and technological nature, as well .as its value, added to the mSamex ecosystem

Our mission

Our goal is to become as profitable within a year. This is not an easy feat, but we've received overwhelming support from top industry players who have reaffirmed the demand for a well designed spot exchange. We want to scale up as quickly as possible and build a community of strong supporters, and so we are conducting a token raise for people who want to help grow mSamex.

We are confident that mSamex has massive potential to rise to the top because we have proven time and time again our ability to enter a crowded market, disrupt the status and become one of the dominant players. We have consistently demonstrated our ability to innovate, execute and grow rapidly. These qualities have served us well in helping us stay one step ahead of the competition. There is an enormous untapped potential in the cryptocurrency market, and we are excited to repeat our success with mSamex. We'd be ecstatic for investors and supporters to join us on this journey.

MESH Yazilim Teknoloji

mSamex is backed by Mesh Yazilim Teknoloji Limited, a ~\$5M quantitative cryptocurrency trading firm. Within a year, MESH Yazilim Teknoloji as Mesh trading became the largest liquidity provider and market maker in the space.

Why mSamex is Uniquely Good and Hard to Replicate

Live Product

Unlike many exchanges and projects who are issuing a token raise, our exchange is already live and actually functional.

Domain Expertise

mSamex was designed by people who really know the products. Everything from collateral to maintenance margin to liquidation process to product offering was redesigned from the ground up by the heaviest user of the products.

Liquidity

The liquidation process in particular is very tricky and crucial to get right--see OKEx's clawbacks--and Mesh has spent thousands of hours understanding exactly how these work and how they could be altered to prevent liquidations and clawbacks.

mSamex's liquidation process is the best in the class and makes heavy use of Mesh's backing as a backstop market maker--though others are encouraged to become a backstop as well!

Fast Development Cycle

mSamex can leverage Mesh Yazilim's tech team--an experienced, battle-tested group used to building complex crypto-trading systems under time pressure. This means that our development cycle is much shorter than others; we can roll out multiple large features per .day

Revenue Model

Exchange Fees

Maker and taker fees are 2bps and 7bps. To become a VIP, an account must trade over a certain volume and/ or hold a certain number of SAMX

New Listing Fees

Creation and redemptions fees are 10bps. Daily management .fees are 3bps

Other Fees

There will be a different fee structures for new mSamex products like options, spot exchange, and margin .trading

Exemptions

There are no fees for deposit, .withdrawal or futures settlement

OTC

The OTC portal on mSamex trades tens of millions of dollars per day and .is quickly growing

Advantages of mSAMEX

In this section, the reasons and benefits of creating the mSAMEX exchange project are briefly explained

Creating a simple platform that can be easily used by newcomers to the market -

Providing an environment for trade with cross exchange links to foreign exchanges

A safe environment for storing cryptocurrencies for users who have problems using .multiple wallets and lost their Private Keys

Making it possible for small but valuable projects and startups to offer and list tokens

SAMX Token owners can decide by voting to add new projects or new coins

Bonus from mSamex Exchange commissions for SAMX token holders

Easy and instant withdrawal of TRY currency on Turkish bank accounts (requires authentication) and in the subsequent phases of other countries, according to the priority of the request and the absence of legal problems

How trades done in mSAMEX?

- Currently, the exchange supports USDT, ETH, SAMX for deposit and withdrawal
- Other currencies can be traded and kept in the exchange, but they must be converted to .the above currencies for withdrawal
- In the first stage, buying and selling orders are done inside the exchange if the price .matches
- Also, exchange smart robots fill orders as quickly as possible by scanning buy and sell .orders in mSamex as well as partner exchanges
- In this process, the end user does not need to do anything and the whole process is done .automatically by the mSamex exchange
- Due to the above possibility, users of the exchange can buy and sell at the global price at .any time

SAMX token distribution

A total of 75,000,000 SAMX tokens are available and this number cannot be increased and will be distributed according to the table below

The reserve tokens will remain locked and the commission income that is allocated to these tokens will be used for the operational costs of the exchange such as servers and maintenance and support, as well as the overcharge of the exchange's insurance account. (Treasury storage tokens do not have the right to vote in listing projects)

The tokens related to the team will remain locked during the first year and after one year they will be released at the rate of 6% (1/3) every year, but the commissions received will be divided among the team members in proportion to the tokens

Advertising tokens will be used for advertising expenses and promotions and are not locked

Crowdsale tokens will be offered to investors in three stages with step and volume discounts before the full launch of the platform to provide the initial capital of the launch

SAMX Benefits and

1- Owners of SAMX tokens will receive a reward in the form of USDT from the commissions received by the exchange (after deducting the referral commissions) depend on the amount of their tokens.

SAMX token owners have the right to vote for the listing of new projects according to their
2- token amount.

3- The cost of listing new tokens is received as SAMX token.

4- Some institutions interested in buying the White Label version of the exchange have and this interest will increase by providing new features such as futures transactions. These products will also be sold in the form of SAMX tokens.

5- SAMX token can be used to pay trade commission with a discount

6- The SAMX token can be used as collateral in futures tradings

7- The SAMX token can be traded on the platform and some other exchanges (the list of exchanges will be announced at the time of listing)

8- The SAMX token with the smart contract address

(0x062A848Abb7f298d44893f17878d46a4b572E05E) was produced on the Ethereum blockchain platform as ERC20 Token and can be stored and received on all wallets that .support Ethereum ETH

This white paper can be optimized and more complete in the next versions. The final version is always available from the project website.
Keep in mind that financial markets and especially cryptocurrency have a high risk. Please invest in these markets with sufficient research and knowledge.
